Objective

I am a highly motivated Software Engineer looking for an opportunity to put my knowledge into use. Creative thinking, problem-solving, teamwork and technical skills are my qualities.

Professional Summary

- An astute professional with 3.4 Years of functional experience in Black Box **Manual Software Testing as well as Automation Software Testing (Selenium Webdriver with JAVA)** with reputed organization.

- <u>**Work Experience on Manual Testing**</u>
  - Good knowledge of **Software Development life Cycle** (SDLC) and **Software Testing Life Cycle** (STLC).
  - Good in **Test Execution Process, Bug Life Cycle**.
  - Detecting bugs & classifying them based on severity, priority.
  - Have performed **functional testing, system testing, system integration testing, ad-hoc testing, smoke testing, regression testing.**
  - Have experience in of functionally tested various Web applications.
  - Implemented Agile Methodology process in the project.
  - Good Knowledge in **Web Service** Testing with the help of **POSTMAN** Tools. Also Good Experience in **WSDL, UDDI and TestNG annotations.**
  - Proficient in writing Test cases by using test case design technique.
  - Experience in **QA Processes, software lifecycle, testing methodology, test automation, Bug tracking & test estimation.**
  - Team reviews, raising Bug, Bug monitoring, providing feedback and worked closely with development team.
  - Experience in Behavior Driven Development Framework implemented by Cucumber.
  - Expertise in bug tracking process using bug tracking tool **Jira**.
  - Well understanding of SRS ,User Stories and Bug Report.
  - Experience in **Agile methodology** implemented by **Scrum Model.**
  - Knowledge of Bug management tool i.e **JIRA and Bugzilla.**
  - Used **MySQL** as front end database utility tool to perform database testing.
  - Used Maven, Cucumber , Jenkins, Git and GitHub and Junit as Runner file in BDD framework.
  - Proficient in Core **JAVA Programming.**
  - Worked on Selenium Webdriver version 3.14 for automating test cases in various functional Modules.
  - Created scripts which involves **Parameterization, Descriptive programming, Handling dynamic objects etc.**

- Good experience of **OOPS concepts, Collection framework, Arrays and String Class in JAVA.**
- Experienced of **assertions** and **Annotations** in **TestNG** framework.
- Experience in executing the test scripts in parallel for **IE, Firefox and Chrome**.
- Also have good understanding of **GitLab** for the **repository** management and **Jenkins** for **continuous Integration**.

Technical Skills

Automation Testing Tools:

- Selenium WebDriver with JAVA

Test Management Tools:

- JIRA

RDBMS:

- MySQL.

Operating Systems:

- Windows family.

Other Tools and Plugins:

- Maven , Cucumber , TestNG, Junit as Runner, Jenkins, Extent Report, Postman, Git and GitHub.

Professional Experience:

1) Working as Software Test Engineer at **xyz , Pune** from July 2018 to till date

Projects Handled

Project #1

Project Name: Post-privatization Enterprise Restructuring
Client   :   Investec, UK
Technologies :   SQL server 2014. Jira

Description:
It provides clients with expert perspectives to help them make critical strategic and alternative investment decisions with confidence. It takes a multi-dimensional approach to problem-solving and formulates effective solutions to address your needs and build highly effective solutions that help you create value. PWP is a leading global institutional asset manager with an unwavering focus on investors' needs. PWP created the Agility platform to provide user organization an Outsourced Investment Team with comprehensive capabilities that can offer customized programs to meet your individual investment requirements.

Responsibilities:
- Prepared Test Scenario, Test case design, and Review it.
- Understand the SRS doc and clarify the doubts with BA

- Performed Functionality Testing, Retesting and Regression Testing.
- Performed manual **functional testing** and constructed positive and negative test scenarios as per requirements.
- Involved in extensive backend testing using **SQL** Queries to retrieve the data from the database and checked data integrity.
- Performed **End-to-End testing manually** and was associated with **User Acceptance Testing.**
  - Testing on staging environment. Have good knowledge of working in project with AGILE model.
  - Understand the FRS document and analyse the requirement.
  - Prepare the test cases from use cases
  - Responsible for Smoke testing.
  - Execute the test case to validate customer requirement
  - Involved in review test case and send review comments to colleagues.
  - Involved in the data validation for Billing system
  - Preparing daily report for the executions of the testcases
- Participate in scrum meeting to discuss about project progress report every day
- Reporting the Regular status to the higher authorities in a timely manner.
- Involved in the Behavioral, Input Domain, Error Handling, Calculation, Base, And Service Level Coverage
- Log the Bug in HP ALM 12
- Participated in client Interaction.

Project #2

Project Name :   Modular CRM- and Billing system
Client   :   **Dimari, Germany**
Technologies :   **SQL Server 2014, HPALM 12.**

Description:
Marketing department in a telecom operator company works hard to define rental & usage charges for different products and services. These charges are defined keeping other competitors and regulatory in mind. Broadly speaking, there are two type of tariffs, also called rate or price plans, depending terminology used in different billing system. There could be different types of charges to be applied for a product and associated services. For a given product, an operator can define one or more of the following charges, but they are not limited to only these charges, there could be some other type of charges depending on country, location and business situation: Product Initiation Charges: These are one-time charges, which can be taken from the customer as a part of installation, activation, service or initiating a connection.

Roles and Responsibilities:
- Responsible for gathering **test execution** data on daily basis and sending mail to Team.

- Responsible for managing Requirements and developing Test Plans, Test Scripts and Test Cases in an Agile environment

- Performing End-to-End testing manually and was associated with User Acceptance Testing and Regression testing

- Actively involved in creation of script from given smoke test cases as well as Regression Test Cases.

- Responsible for interacting with Team members and client, in daily SCRUM meeting.

- Played a key role in implementing Agile QA testing processes

- Involved in Bug log, Bug tracking and resolution.

- Involved in automating the Back End process to reduce the manual effort:
  - Also involved on the automation testing by using Selenium web driver by Java.
  - Creating .feature files and mapping code for given feature/functionality.
  - Involved in the daily scrum meeting.

- Used Jira as Project Management tool as well as Bug Tracking Tool.

Academic Details

- B.E (Computer Engg.) from ,PUNE UNIVERSITY, in 2012.

Personal Details

Date of Birth	:	15th Nov 1985
Gender	:	Female/male
Nationality	:	Indian
Languages Known	:	Marathi, Hindi and English
Present Address	:	………………………………….,Maharashtra
Marital Status	:	married/unmarried
